

## FERRARI AT MAKOTRAC

The first running of the Circuit Sprint was organised by North Queensland Motorsport Promotions. It was held on the 20th of December 2010. It attracted 18 competitors to battle it out time attack style. It was the first event for the promoters and competitors, for most it was the first time on the Makotrac Racetrack. Some were reluctant to go fast, but as soon as the first sound of engines hit the air early Sunday morning, nobody was holding back.

It was also the first time Makotrac had a Ferrari on the track, the unique 348 GTS put in some laps, making some great Italian exhausts notes.

North Queensland Motorsport Promotions is run in conjunction with the Far North Queensland Motorsport Club, which hosts Motorkhana events, off road events around the North Queensland region.

All of the competitors are keen to run again, a few competitors travelled as far as Townsville for the event, those competitors possibly had the upper hand as Townsville drivers have raced on a purpose bitumen track before. Many more potential drivers have shown their keen interest for the next event, which should be held around the start of March this year.
